SPECIAL EDITION : NEW ITEMS (2021 - 2023)

COMPANY HISTORY

Founded in 1974 by Ewan Cheung, our company from the very beginning has always been associated with innovative ideas and quality design.

Ewan started his career in fireworks in 1962. China, at this time, mainly manufactured firecrackers for domestic use. Although some firecrackers were exported to Europe, Canada, Australia, South Africa, and Hong Kong, the quantity was not large. Since the United States did not have a trade agreement with China, firecrackers were mainly supplied to the US by Macao, where production was a top industry. Realizing the potential for a large export market, Ewan traveled to Japan in 1963 and introduced various types of Chinese firecrackers to the Japanese market. At the same time he began importing Japanese products into the Hong Kong area.

During this period of time, Japan was one of the biggest manufacturers and exporters of fireworks including both consumer and display pyrotechnics. With new types of fireworks now being introduced to the Chinese market from Japan, gradually the Chinese factories learned the technique of making different types of items such as roman candles, bottle rockets, fountains, and small aerial devices. Along with the use of various colors. China started to produce and export fireworks in addition to its traditional firecrackers.

In 1965, Singapore and Malaysia lifted its ban on firecrackers. Overseas suppliers in these countries began the import of Chinese firecrackers and the export volume of firecrackers from China jumped several times. Two years later, Indonesia also opened its market to Chinese firecrackers, further increasing demand. Sadly, due to misuse and accidents, firecrackers and fireworks were again gradually banned in these countries around 1970. However the stage was now set for the Chinese firework industry to explode onto the foreign market place in full force. In Europe, Japan, Australia and especially the United States where trade between the US and China had reopened due to President Nixon, the demand for Chinese made fireworks was about to take off. Mr. Cheung quickly took advantage of the new trade agreement and became the first person to sell and ship Chinese fireworks to the US since 1949.

Sensing a fast growing business opportunity, in 1974 Ewan formed his own company as we know it today and shortly thereafter Joe Wan was brought on to help run the rapidly expanding operation.

At that time, all Chinese firework factories and export corporations were state owned and the supply of fireworks went through a preset channel. The head corporation in Beijing controlled the price policies of all export corporations in each province and only a few of these were allowed to handle fireworks, such as Guangdong (Horse & Tiger-head brand), Hunan and Jiangxi (Red Lantern), Guangxi (Link Triad), Beijing City and Shanxi (Temple of Heaven), Zhejiang (West Lake), Jiangxi (Flower Basket) and Shanxi (Wu Tai Mountain).

Each corporation would sell the same type of items, for example Air Travel and Moon Travel bottle rockets, at the same price. Normally the price would be adjusted each year on New Year's Day and in practice, there was no negotiation of the price.

The system started to change around 1987 when the Chinese Government allowed more freedom in business activities and the head corporation started to lose control over the provincial corporations. Private companies in China were allowed to do business with individual factories and price competition emerged.

Ewan noticed that there was a market for high quality fireworks and he applied to set up joint venture firework factories in Guangdong. All joint venture partners from outside of China had to get permission first, and in 1992 and 1993, we built our first two factories in Guangdong. One produced machine pressed rockets and the other Vulcan brand display shells. We were the first company in Hong Kong to set up our own firework factories in China. We also pioneered, a few years later, our own paper tube factory to produce high quality machine rolled tubes using machines from Taiwan and Germany. Due to limited production capacity, we first targeted the European market and when the high quality fireworks were well received, we set up another base in Hunan in 1993 and built more factories in Liuyang.

In 1998, mainly for the US consumer market, we created the Shogun brand, which has become one of the most highly popular brands, known for top quality performance, innovative packaging and exciting graphic design.

For display fireworks, our Vulcan brand was created and has become increasingly well known for its high quality ball and cylinder shells, roman candles, rockets, and many other European style firework items. We now offer 1.4G Proline under the Vulcan brand name.

In the past 29 years, we have expanded our business in China to include branch offices in Liuyang and Beihai along with our main office in Hong Kong. We now have 2 factories in Hunan and Guangxi provinces. In addition, there are about forty factories working closely with us to help produce all our hundreds of firework items.

Since starting our own factories to produce fireworks of the highest standards, we have truly created a new direction in the firework industry and led the way for other factories to follow. We have some of the most modern facilities and equipment in China today along with an experienced and dedicated workforce. We continue to strive to be the market leader in fireworks, producing top quality pyrotechnics and creating original and innovative firework products year after year.

TOP QUALITY COMPETITIVE PRICE TIMELY DELIVERY

Introduction

"Shogun" was introduced to the USA consumer fireworks market in 1998. The majority of "Shogun" fireworks were generic Chinese items resurrected with better design, packaging and most importantly, improved duration, performance and quality. The "Shogun" range now includes many newly created fireworks.

All "Shogun" fireworks are produced in our associated fireworks factories in China. Their production is under our strict supervision and quality control. This is the only way to maintain quality and confidentiality.

Our goal is to continue to develop new fireworks for the worldwide market, whilst maintaining our superior quality and competitive prices.

China Offices

We have a network of established offices and warehouses in Liuyang and Beihai. Our experienced and hard working team in China has contributed to our present success with on time delivery, excellent quality and innovative new items.

Exclusive Designs

We welcome our customers' exclusive labels on our branded items, with a set minimum quantity. The same care will be taken to ensure that the quality is the same as our own brand name items, and most important, we will keep the design for the exclusive use of the owner. As an extra service to our customers, we provide affordable graphic design services for labels, stickers, catalogues and other printing matters through our in-house art department.

Quality Assurance

All our products are tested by an independent quality control service provider according to the Standards as required by our customers. Test reports are digitally available on request.

We are also an AFSL member. In addition, IQA B.V. (International Quality Assurance) undertakes additional performance and packaging testing on our consumer fireworks.

GROSS WT	NEC			
Gross Weight per Carton in kg	Net Explosive Content per unit in grams	De-regulated Novelties	Freight Busters	Great Value

Although ocean freight has been steadily coming down, it is still at a very high level compared to the past. Reducing the volume of an item is one way to help reduce the final landed cost. Please watch out for the following items that were specially designed as Freight Busters items, eliminating all the unnecessary empty space in fireworks, or in the packaging design to reduce the size, fitting more in a shipping container, thus reducing freight by item.

500 Gram Cakes:

LBMC-001	Comet Blazer	page 04
